

FOOD SCIENTIST

Do you like to play with your food?

Science plays a big role in the food people eat. Food scientists use chemistry, biology, cutting-edge nanotechnology, and other sciences to keep food safe and healthy. Food scientists figure out the nutritional value of foods. Some food scientists discover new food sources and create new food products. Food scientists work with both fresh and processed foods. They work in research laboratories, test kitchens, and government agencies. Food scientists need at least a bachelor's degree and a strong background in science.
