

HEALTH INFOMATICS MANAGER

Do you want to make health care smarter?

Health informatics is a rapidly growing scientific field that uses technology to advance medicine. Health informatics managers use data to save health care costs, share knowledge, personalize health care, and improve patient outcomes. For example, electronic health record systems make managing patient records safer and easier. Health informatics managers must earn at least a bachelor's degree and need skills in areas like database systems, network architecture, and programming. Health informatics managers typically work in hospitals or for health insurance companies.
